

ICGCommerce

Downloaded orders

The downloaded orders have been modified to take into account the rate type (with or without taxes). Now orders which are not marked that we want download, do not block the download of other orders.

ICGCommerce configuration

It has been added a button in the configuration to choose which rates used in PrestaShop are with or without taxes.

It has been fixed the issue calculating the stock of items which are sent to the store. When they are sold from a terminal it was not properly calculated the stock on the website.

Changes in the log

The log has been modified to show if exists orders not completed in PrestaShop.
