CALL SCREEN

ICG Software

Notifies when the order is prepared, avoiding queues in the pick up point

INFO OF YOUR ORDER
YOUR ORDER IS

John Doe 123	READY
Maria W. 124	IN PREPARATION
Paul Smith 125	IN PREPARATION

Connected to a POS with FrontRest

Better rotation on tables

Improves the service to the client

Avoids the queues in the pick up point

Big screen format and fully configurable!

Main advantages:

☑ Shows on one or more informative screens the service number and the state of the order (in preparation, prepared) for the client to go pick it up on the pick up point

☑ **CallScreen** works without intervention of the personnel, by being integrated with the kitchen screens

☑ The delivery is confirmed in a tactile screen or by reading the bar code of the order

☑ The background image, texts and colors are configured on function of the corporate image of the client

☑ Avoids agglomerations on the pick up point, having the customers permanently informed of the preparation state of their orders

☑ Integrated with FrontRest, T-Quiosk and online orders (Click&Collect)
