

Pre-sale and autosale mobile solution for the distribution:
Beverages and food retailers, supplies, coffee companies...

Take orders with information about last purchase

Display on the map the next client to visit

Information about the route performed in real-time through geolocation

Routes management and tracking in the HeadQuarters

What is FrontAutoventa?

FrontAutoventa is the mobility solution from ICG in the distribution sector for sales men who perform sale, pre-sale and delivery route.

Take orders from the clients' facilities and link with the ERP **ICGManager** in the Headquaters in real-time.

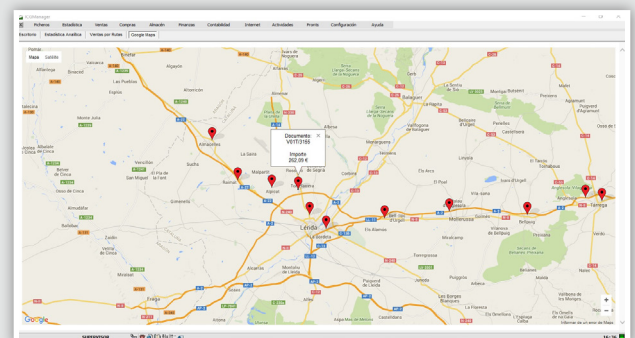

It is allowed to perform all the functionalities from a tablet (routes, pending collections, check stocks, invoicing...) with 4G, and it is operative without data connection. It reduces the waiting time between the order and the service.

Order confirmation with the client signature

Wireless printing via Bluetooth

FrontAutoventa allows you to have information about the route performed in real-time through geolocation. Register time and GPS coordinates where the order has been taken in order to track from the Headquaters.
